

ALEX ANKOMAH

Bujumbura, Burundi | Tel: +(257) 66305754 | Ghana: +(233) 541204399 | Email: ankomahalex@gmail.com

PROFESSIONAL SUMMARY

Telecom Network Planning & Optimization Engineer with over 20 years of experience in RAN operations, integration, and optimization across multi-vendor environments — Huawei, Nokia, and Ericsson. Proven expertise spanning 2G–5G mobile technologies, including gNodeB/eNodeB/NodeB/BTS integration, parameter tuning, and KPI performance improvement. Currently supporting national-level network optimization for ITS/ARCT (Burundi National Telecom Regulator). Hands-on professional skilled in OSS configuration (U2020, ENM, NetAct), drive testing, and inter-RAT optimization, with a strong background in network performance analysis, troubleshooting, and regulatory compliance.

CORE COMPETENCIES

5G/4G/3G/2G RAN Operations & Maintenance | RAN Node Integration (gNodeB, eNodeB, NodeB, BTS) | Multi-Vendor Expertise (Huawei, Ericsson, Nokia) | OSS & Node Management (U2020, ENM, NetAct, WebLMT, Moshell) | Parameter Tuning & Optimization | Drive Testing & Post-Processing (TEMS, Nemo, Actix) | Spectrum Analysis & Interference Resolution | Inter-RAT & Feature Activation (NSA, CA, MIMO, VoLTE, CSFB) | RAN Modernization & Swap Projects | Training & Knowledge Transfer

KEY ACHIEVEMENTS

- Led multi-technology RAN optimization (2G–4G) and drive test analysis at ITS Burundi, contributing to national QoS benchmarking.
- Supported Huawei AirtelTigo Swap Project in Ghana – awarded for excellent delivery.
- Part of Nokia/Alcatel 3G U900 expansion project in Senegal.
- Huawei award recipient for exceptional KPI improvement.
- Deployed 42 Mbps DC-HSPA activation (Orange Niger) improving network capacity.

PROFESSIONAL EXPERIENCE

ITS / ARCT Burundi – Bujumbura, Burundi (Feb 2023 – Present)

Network Planning & Optimization Engineer (NPO)

- Perform nationwide RAN QoS monitoring, KPI analysis, and interference resolution.
- Conduct drive tests, Atoll coverage validation, and spectrum compliance verification.

Emerald Telecom (Ghana) – Huawei / MTN Project (May 2022 – Feb 2023)

Drive Testing & Optimization Engineer

- Integrated new sites; executed configuration scripts; validated PCI, TAC, PSC, and neighbor relations.
- Conducted drive tests using TEMS and Nemo Handy.

Huawei – Orange Bissau / Nokia-Alcatel – Orange Senegal & Niger (2014 – 2016)

3G RNO Consultant / Optimization Engineer

- Integrated and optimized 3G NodeBs, configured neighbors, activated features (DC-HSPA, 3rd Carrier), and performed NodeB upgrades.

Glo Mobile Ghana – Accra, Ghana (Apr 2011 – Nov 2014)

Manager, Network Performance & Optimization (NPO)

- Led 3G rollout pre-tuning, license activations, and NodeB integration.

Earlier Roles: Airtel Ghana (2010–2011), Zain Ghana (2008–2010), Ghana Telecom (2001–2008).

TECHNICAL EXPERTISE

Technologies: GSM, UMTS, LTE, 5G NSA/SA

Vendors: Huawei (U2020), Ericsson (ENM), Nokia (NetAct)

Tools: Atoll, Actix, TEMS, Nemo, Anritsu Spectrum Analyzer

Protocols: S1, X2, NG, F1, GTP, IP

Database/Reporting: Oracle, MySQL, Power BI, Excel Dashboards

EDUCATION

BSc, Information Technology — Methodist University College of Ghana (2008)

Associate in Telecommunication Engineering — Multimedia University, Malaysia (2001)

CERTIFICATIONS & TRAINING

- Project Management — Glenridge Consulting Group LLC (USA)
- Data Science & Analytics — IBM Digital Nation Africa
- Tableau Professional — Simplilearn (2022)
- Ericsson, Huawei, Astellia GSM/UMTS/LTE Optimization Training
